

Lockable Secured Front Panel

Features:

- Supports Standard Definition Sources
- Supports High Definition Sources
- Scalable System Architecture
- Solid-state System Components
- Industrial Grade Server Chassis
- Redundant Power Supplies
- Rated 100,000 Hours MTBF
- RS232 Controllable for 3rd Party Control

System:

- Meets True Mission Critical Standards
- Rated for 24/365 Operation and Uptime

Solid-state System Components

Processing:

- Configured with Intel Based Processors

Memory:

- Configured with 8-64GB RAM

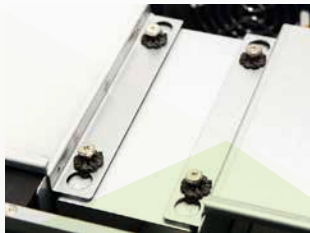

Storage:

- Solid-State Hard Drive Storage
- Optional RAID Configurations

Inputs:

Capable of capturing high definition resolutions at native refresh rates. The multi-screen driver will support up to a maximum of 64 HD/RGB/DVI captured sources.

Ruggedized Industrial Chassis

Outputs:

Capable of displaying high definition resolution at the native pixel resolution of the connected display. The multi-screen driver will support up to a maximum of 64 HD/RGB/DVI screens.

Software:

- DataView Video Wall Control
- DataView Software Suite

Dimensions (W x H x D):

- 19.00" x 7.00" x 26.00"
- 482.6 mm x 177.8 mm x 660.4 mm
